Star, NC 27356

Subject: Melvin Yarboro Property  
2205 Oak Hill Drive, Greensboro, NC  
Incident # 10017, Site Ranking E/050

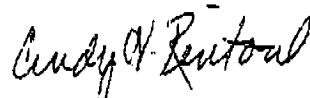

Dear Mr. Yarboro:

On January 11, 1999, the Division of Waste Management (DWM) Winston-Salem Regional Office received a *Natural Attenuation Monitoring Report* for the subject site which contained a recommendation that the site be closed. A review of the report and supporting information on file shows that contamination has been cleaned up to the required levels established by DWM.

Based on information provided to date, the DWM determines that no further action is required. This determination will apply unless the DWM determines that the discharge or release poses an unacceptable risk or potentially unacceptable risk to human health or the environment. This determination does not absolve you of responsibility if additional contamination is discovered at the subject site in the future.

Thank you. If you have any questions, please feel free to contact Melanie Wells at (336) 373-3771.

Sincerely,

Cindy H. Rintoul  
UST Section Supervisor
